
ORI vendor codes

Full list of ORI Vendor Codes as of 29 08 2012.

Specification GS ORI 0002-2 provides a data field whose function is to identify the manufacturer of an ORI compliant node by means of a 3-character ASCII code.

The following table lists the ORI Vendor Codes allocated at the present time. This table may differ from that in Annex B of the current published version of the specification GS ORI 0002-2, as it updated more frequently than the table in the specification.

Other vendors wishing to manufacture equipment conforming to the ORI standard may request the assignment of an ORI Vendor Code by contacting: tim.frost@vodafone.com

Device manufacturers shall use their assigned Vendor Code and NOT the Vendor Code of any other company.

Table 1: ORI vendor codes

| Vendor Code | Organisation Name |
|--------------------|-----------------------------|
| ALU | Alcatel-Lucent |
| FJT | Fujitsu |
| HWT | Huawei Technologies Co. Ltd |
| KAT | Kathrein-Werke KG |
| UBD | Ubidyne GmbH |
| ZTE | ZTE Corporation |

NOTE: The existence of an assigned Vendor Code does not indicate that the company to which it was assigned is still manufacturing or trading under the name shown, nor that is a member or participant of ORI.
