
Terms of Reference Industry Enabling WG (IEG)

Approved at MEC#01, December 2014

The Industry Enabling WG will drive the deployment of the Mobile Edge Computing concepts within the industry by the following activities:

- Stimulate Proof-of-Concepts by the industry that validates the MEC Group Specifications (GSs);
- Describe examples of MEC service scenarios;
- Stimulate the OTT industry to deploy their applications using the MEC APIs;
- Support the creation of an MEC industry eco-system;
- Accelerate the adoption of the concept and the standards; and
- Address legal and regulatory requirements.

The Industry Enabling WG shall coordinate its work with the technical activities within the ISG MEC and coordinate its MEC market development activities with external industry organizations.

The group will produce (informative) Group Specifications, and/or documents in the form of white papers and tutorials. The group will also support the arrangement of workshops and events.

The Industry Enabling WG Chair will report its progress to the ISG MEC Plenary and its deliverables will be submitted to the ISG MEC Plenary for approval.
