Annex B (informative): Register of VPS CNI codes

NOTE: The network codes in this table are also used in the Application Information structure of electronic programme guide broadcast according to ETS 300 707 [3]. In this application the CNI field is 16 bits wide and the codes listed in this table should be extended with a leading "0". Thus in the EPG application, the VPS code "DC1" is represented as "0DC1".
