

Publication [TS - TR - SR - GS - GR]

Status code	Milestones	Description
0	WI creation	This milestone marks the crucial step when a Work Item (WI) is created via the Portal or the ETSI Work Programme.
0 gp	Work Item proposed to WG	The Work Item is submitted to the Work Group.
0 a	Work item adoption	The Work Item (WI) is adopted by the Technical Group if not a Standardisation Request (SReq). If the WI is under SReq, it is adopted by the National Standardisation Bodies (NSBs).
1	Start of work	This milestone marks the crucial point at which the development or drafting of the Work Item begins.
2	Early draft produced	Preliminary version of the Deliverable, still under active development.
4	Stable draft produced	Version of the Deliverable that has reached a level of technical completeness. The Deliverable is no longer subject to technical modifications, its content is relatively stable and no major technical modifications are expected.
6	Final draft for approval produced	Version of the Deliverable considered as the last version of the Deliverable that is considered and ready for approval.
7	Final draft endorsed by the Working Group	Final version of the Deliverable submitted to the Working Group for endorsement.
8	Final draft endorsed by the Technical Group	The Technical Group has reviewed and given their official approval or support for the final draft.
8 A	Final draft registered by ETSI Secretariat	After a conclusive quality check produced by the ETSI Secretariat, ensuring that the ETSI Drafting Rules have been followed, the draft is officially entered into the system by the ETSI Secretariat and is now part of the Standard Making Process (SMP).
12	Publication	The final draft is published and defacto made available to all via the web.
